Insights Video Analytics

View per-video learner data to help course teams understand how students are learning.

Third-party Auth (with OpenCraft & others)

Enable register & sign in with Facebook, Google and/or on-campus systems to reach more learners.
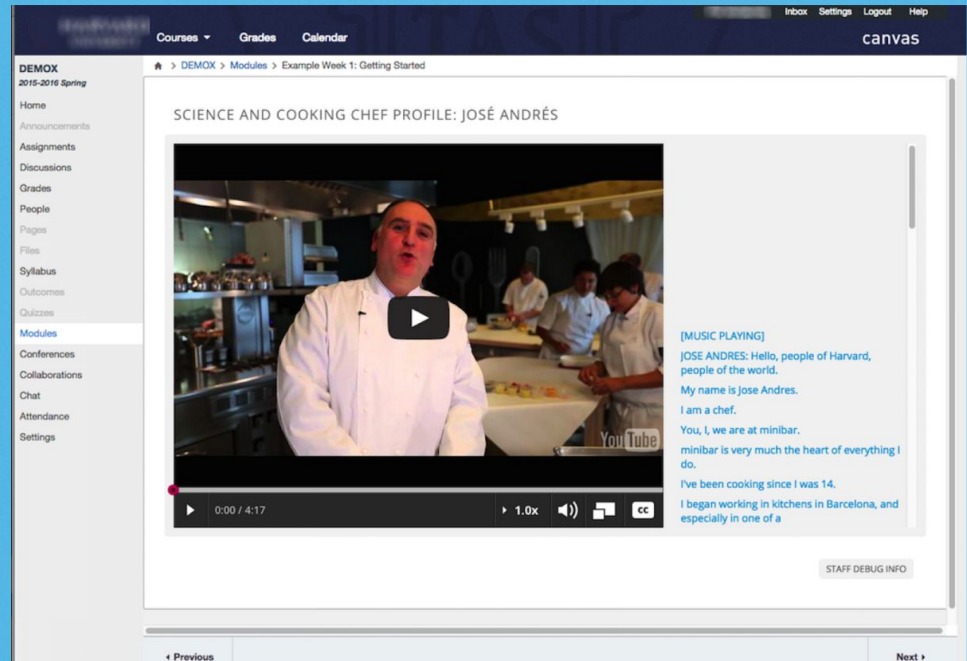

LTI tool provider (w/ Harvard, UBC & others)

Embed edX course content into campus LMSs or other LTI-compatible systems for efficient content reuse and grade transfer.

Hinting & Feedback (w/ OLI & Stanford)

Provide enhanced feedback to learners when attempting assessments.

DROPDOWN WITH HINTS AND FEEDBACK   (1/1 point)

A/an _____ is a vegetable.

[potato] ✔

Correct: A potato is an edible part of a plant in tuber form and is a vegetable.

[Check] [Hint] [Show Answer]

MULTIPLE CHOICE WITH HINTS AND FEEDBACK (1 point possible)

Which of the following is a vegetable?

○ apple
○ pumpkin
○ potato
● tomato ✖

Incorrect:
Many people mistakingly think a tomato is a vegetable. However, because a tomato is the fertilized ovary of a tomato plant and contains seeds, it is a fruit.

Birch & Cypress releases

Stable, packaged releases give more predictability and an easier upgrade process to Open edX platform administrators.

Announcing Cypress, the latest Open edX release!

Submitted by Sarina Canelake on Thu, 08/13/2015 - 10:27am

Printer Version   PDF Version

We are pleased to announce the release of Cypress, the third release of Open edX, the open source online learning platform that powers edX.org as well as hundreds of other online courses around the world. To get it now, please see the Cypress installation instructions.

This release is absolutely jam packed with new features and improvements that have been developed since the release of Birch in January, including:

- OLI Hinting
- Creative Commons
- Polling and Survey XBlocks
- Learner Profiles
- Course Search
- Randomized Content Blocks
- Single Sign On (SSO)

Thanks!
