About this course

Chatbots are one of the most exciting and in-demand topics in tech. Businesses around the world are increasingly showing an interest in their potential for cost-saving and improving customer service availability.

In this course, you'll learn how to build chatbots powered by Watson and how to approach making money by selling chatbots to clients.

We'll cover:

- How to sell chatbots to prospective clients online and offline;
- How to plan and build chatbots using a visual tool provided by IBM;
- How to test, analyze, and improve your chatbots;
- How to deploy your chatbots to websites via a handy WordPress plugin

Leveraging the AI power of Watson Assistant, you will be able to accomplish all this without the need
