

IBL Education

Partnering to Deliver Exceptional Learning Experiences at Scale

San Diego | March 2019

Blockchain Learning Ecosystems Open edX

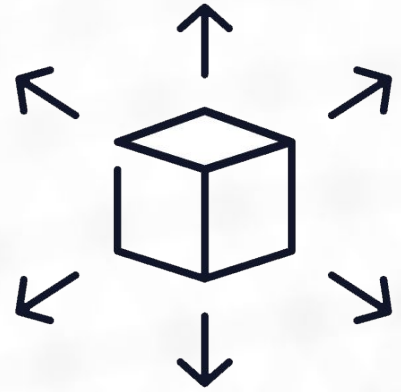

Blockchain
Deep Learning
Machine Learning
“The Cloud”
Influencer Marketing (?)
Quantum Computing

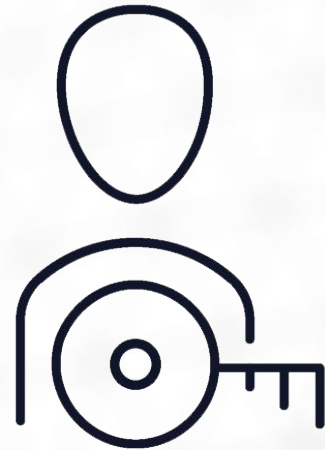

Data Ownership in the long term?

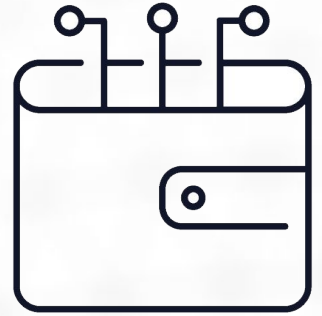

Centralization: Business incentives

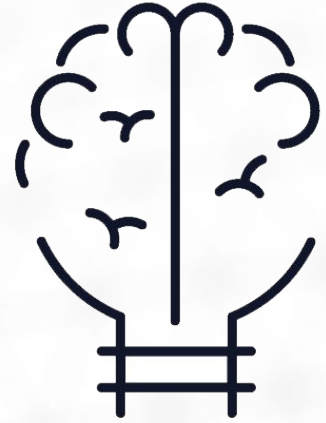

Centralization: User lock-in

Blockchain as the infrastructure layer

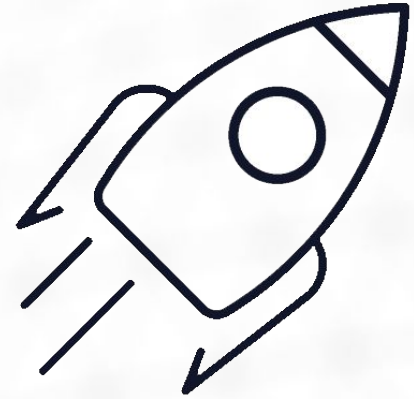

Rethinking Learning Ecosystems

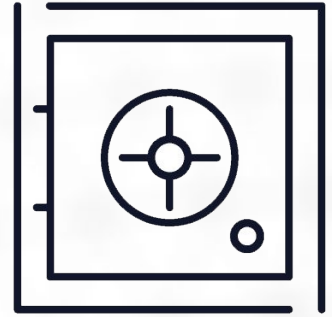

Obvious use case: Certificates

Another one: Adaptive Learning

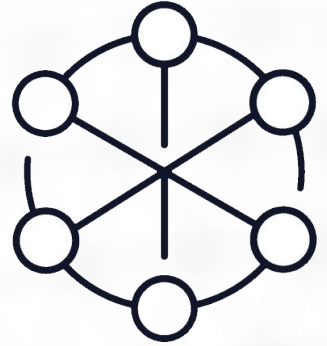

User Management and other key data

Are these problems
worth solving?

Blockchain allows
us to share without
trusting each other

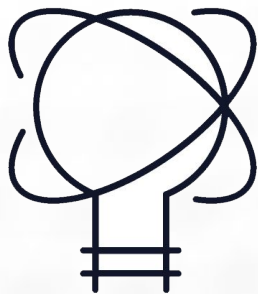

Public or Permissioned Blockchains

Blockchain in Open edX: API's and Visualizations
