Studio Advanced

*A course for people who make courses.*

Harvard**X**

Focus

- Advanced course planning and design
- Better, more efficient operations
- Beauty and elegance
- Inventive uses of existing features

Reusable code

Easy copy/paste tools

A real course

Not just a grab-bag

Setup requirements

1 point possible (ungraded)

Where can the `<link rel="stylesheet">` code be added in edX Studio to indicate you wish to use a different style sheet on a particular page?

- ☐ In an empty raw html component

- ☐ In a text component

- ☐ In universal course-site settings

- ☐ In a raw html component, containing other

Maintain Height

1/1 point (ungraded)

My image slider keeps changing height and I want it to stop. How can I fix that?

- ○ Use just hx-navslider.

- ● Set the same height on everything. ✔

- ○ Use one of the Slick slider settings.

- ○ Can't fix it.

Submit   ❶ Show Answer

✔ Correct (1/1 point)

Built on experience

Made by people who make classes

OVERRIDES

⚠ The Advanced Settings page says "Any policies you modify here override all other information you've defined elsewhere in Studio." *This is not always true.* In many cases, such as the items under "Assignment

DEVELOPING A STRATEGY

1. **What is the purpose of cohorts for your course?**

  • Research, e.g. comparison between variables

  • Community, e.g. study groups

CSS Checklist

In preview and live - remember to check both in sep to compare

• **Top site navigation bar changes** - did the edX edX icon or your profile picture distorted?

• **Loading time** - is the page having difficulty loa

• **Unit navigation** - are you able to press 'next' o above the main text body?

• **Site look and feel** - is the text suddenly bigger/ displaying font different?

• **Did anything jump?**
